Education

ECPI University

August 2014 – Present

Bachelors in Computer Science with a focus on Database Programming

Fluvanna County High School

August 2010 – May 2014

High School Diploma

Achievements

Websmith Sensors Project

MVP

The goal of this project was to create an Android application for Websmith that would read data from a Mantis Open Stem Climate Sensor via Bluetooth in a useful and valuable way to the user. We were placed into two teams competing against each other with my team being the winning team, as well as me being voted as the MVP of the project.

Technical Skills

Programming

C++/C#/C, Java, Android, iOS

Web/Infrastructure

HTML, CSS/Sass, JS/jQuery, PHP, SQL

Work Experience

Universal Community Developers

February 2017

Full Stack Developer

Universal Community Developers is a non-profit organization for whom I built, and maintained the site www.universalcd.org. I did all the front end, back end, and server administration work that needed to be done. Skills used for this project were HTML, CSS/SCSS, SQL, PHP, and JavaScript. I was also in charge of setting up the domain names, DNS settings, SSL certs, the VPS, and hosting of the site.

Authentic Knitting Board

June 2013 – July 2013

Laborer
